Installation Instructions & User Guide

Please leave these instructions
with the end user

Product Code: AL BF Range (D1)

Specification

Dynamic Water Pressure
Min: 0.2 bar Max: 5.0 bar

Maximum Static Pressure: 10.0 bar

Inlet Water Temperature

Maximum Hot: 65°C

Inlet Connections

3/4" BSP

Outlet

Recessed M16.5
Flow Straightener

Pack Contents

Operation

Hot

Cold

Spout

Tools Required

Prior to Installation

All products manufactured and supplied by Bristan are safe to use provided that they are installed, operated and receive regular maintenance in accordance with these instructions.

This product needs to be installed in accordance with, and meet the requirements of The Water Supply (Water Fittings) Regulations (Northern Ireland) 2009 and The Water Supply (Water Fittings) (Scotland) Byelaws 2014.

For full Installation Requirements & Notes (IRN) please visit
www.wrasapprovals.co.uk/approvals-directory

Isolation valves must be fitted to the inlet water supplies to ensure ease of future maintenance.

Before installing this product the water supply must be thoroughly flushed in order to remove any swarf, solder etc. Full access must be made available for future maintenance/servicing purposes.

This product must not be modified in any way as this will invalidate the guarantee.

Spare Parts

To replace any spare parts
for your tap, why not scan
the QR Code or visit
www.bristan.com and
search for your product.

Installation

1

Feed the threaded
inlets through the
plinths, ensuring
the rubber seals
are in place.

Continue to
thread the tails
through the tap
holes.

2

Rubber Washer
Backnut

Slide the rubber washer
onto the threaded tail
followed by the backnut.

Tighten the backnut until
the tap is held securely in
place.

3

Connect the hot and cold
water supplies to the
threaded tails.

REMEMBER
Hot on the
left, cold on
the right.

4

IMPORTANT
Turn on water
supply for a few
minutes and check
all joints and
connections for
any leaks.

Your tap is now
ready for use.

Valve Replacement

Spout Seals Replacement

- Isolate water supply before starting!

Outlet Cleaning

Troubleshooting

| Symptom | Cause | Remedy |
|--|---|--|
| Low Flow | Partially closed isolation valve. | Open isolation valve. |
| | Airlock or partial blockage in the supply pipework. | Flush through pipework to ensure removal of debris and any airlocks. |
| | Partial blockage in the outlet | Remove to Clean and soak in suitable solution. |
| No hot water or cycling hot and cold | Instantaneous water heater cycles on and off as flow rate or pressure is too low. | Increase water flow rate or pressure through system. |
| No Flow | Closed isolation valve. | Open isolation valve. |
| | Mains water supply turned off. | Turn on mains water supply. |
| Temperatures not corresponding with taps | Inlet pipes have been connected incorrectly | Swap the inlet tails around. |

General Cleaning

Bristan products are made from premium materials, with hand polished, electroplated, PVD or EPD finishes.

Your taps or shower should be regularly cleaned with warm water, a mild pH-neutral liquid soap, and polished with a soft cloth. Any residues from soap, toothpaste, shampoos and shower gels can cause blemishes if not rinsed off straight after use.

Household bleaches and cleaners contain harsh chemicals and may damage the surface finish. Avoid using abrasive cloths, scouring pads, scrub sponges, steel wool or anything similar.
