

Installation Instructions & User Guide

Please leave these instructions with the end user

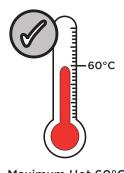

ELE BAS BLK (D1)

Specifications

Dynamic Water Pressure Min: 0.5 bar **Max:** 5.0 bar 3.0

Maximum Static Pressure: 10.0 bar

Inlet Water Temperature

Maximum Hot 60°C

Inlet Connections

1/2" BSP Flexible Tails

Outlet

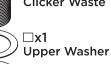

5lpm M24 Coin-Slot Aerator

Pack Contents

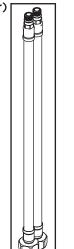

□x1

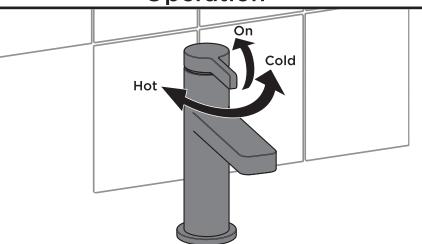

Operation

Tools Required for Installation/ Maintenance

Adjustable Spanner

Hexagonal Keys

Flat Head

Box Spanner (fixing rod nut)

Socket Spanner

Prior to Installation

All products manufactured and supplied by Bristan are safe to use provided that they are installed, operated and receive regular maintenance in accordance with these instructions.

This product needs to be installed in accordance with, and meet the requirements of The Water Supply (Water Fittings) Regulations (Northern Ireland) 2009 and The Water Supply (Water Fittings) (Scotland) Byelaws 2014. For full Installation Requirements & Notes (IRN) please visit www.wrasapprovals.co.uk/approvals-directory

Isolation valves must be fitted to the inlet water supplies to ensure ease of future maintenance.

Before installing this product the water supply must be thoroughly flushed in order to remove any swarf, solder etc. Full access must be made available for future maintenance/servicing purposes.

This product must not be modified in any way as this will invalidate the guarantee.

Spare Parts

To replace any spare parts for your tap, why not scan the QR Code or visit www.bristan.com and search for your product.

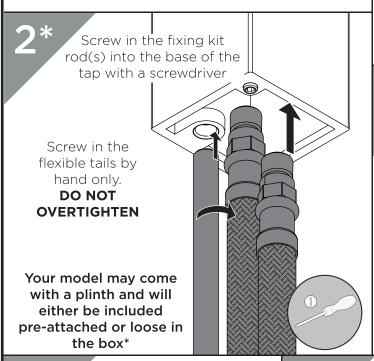

Important

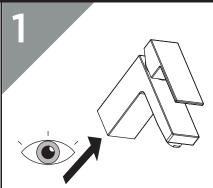

The images shown are for illustrative purposes only.

The product you have purchased may look different to those pictured in this booklet but will follow the same installation steps.

Your contents page will be specific to your product.

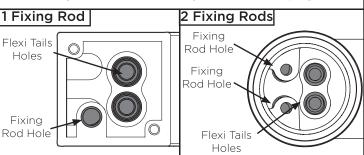

If you find your product or any of its components differ from those shown on the contents page, please contact our customer support.

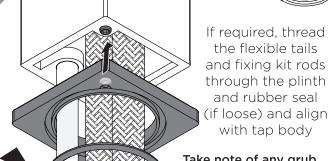

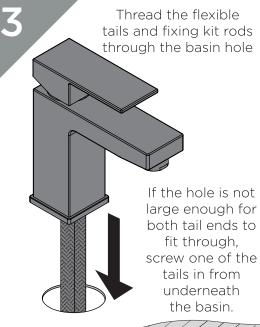

Look underneath the tap body to observe fixing kit rod(s) and tail inlet positions

Depending on the model, the tap will utilise 1 or 2 fixing kit rods. Refer to your contents page

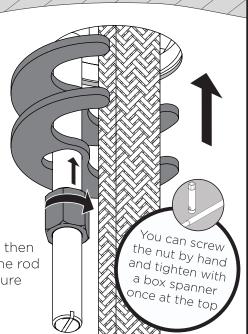

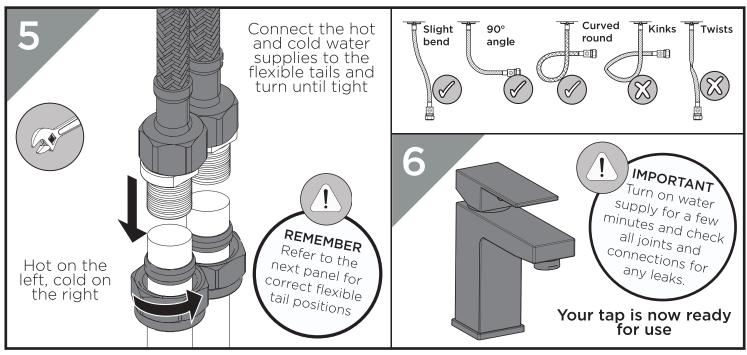

Take note of any grub screw holes on the underside of the tap and align them correctly to the holes on the plinth

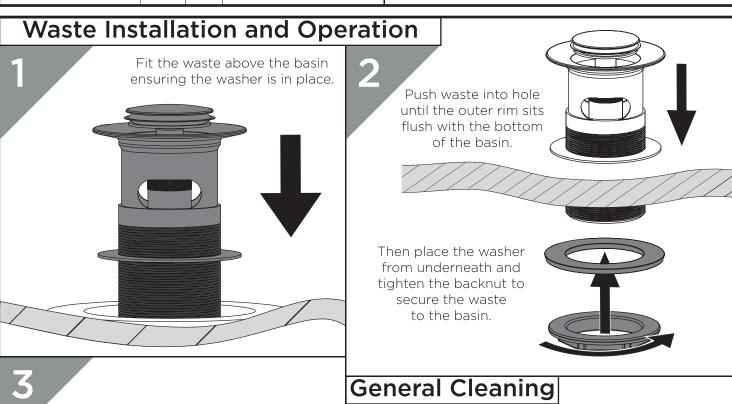

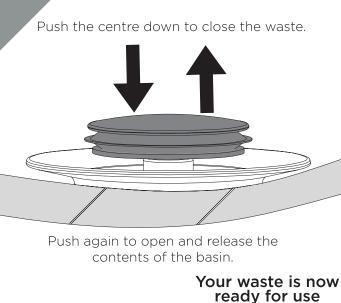

From underneath the basin, slide the rubber gasket and metal c plate along the fixing rod(s) with the gasket sitting on top of the c plate

Align the gasket and c plate, then begin tightening the nut up the rod towards the basin until secure

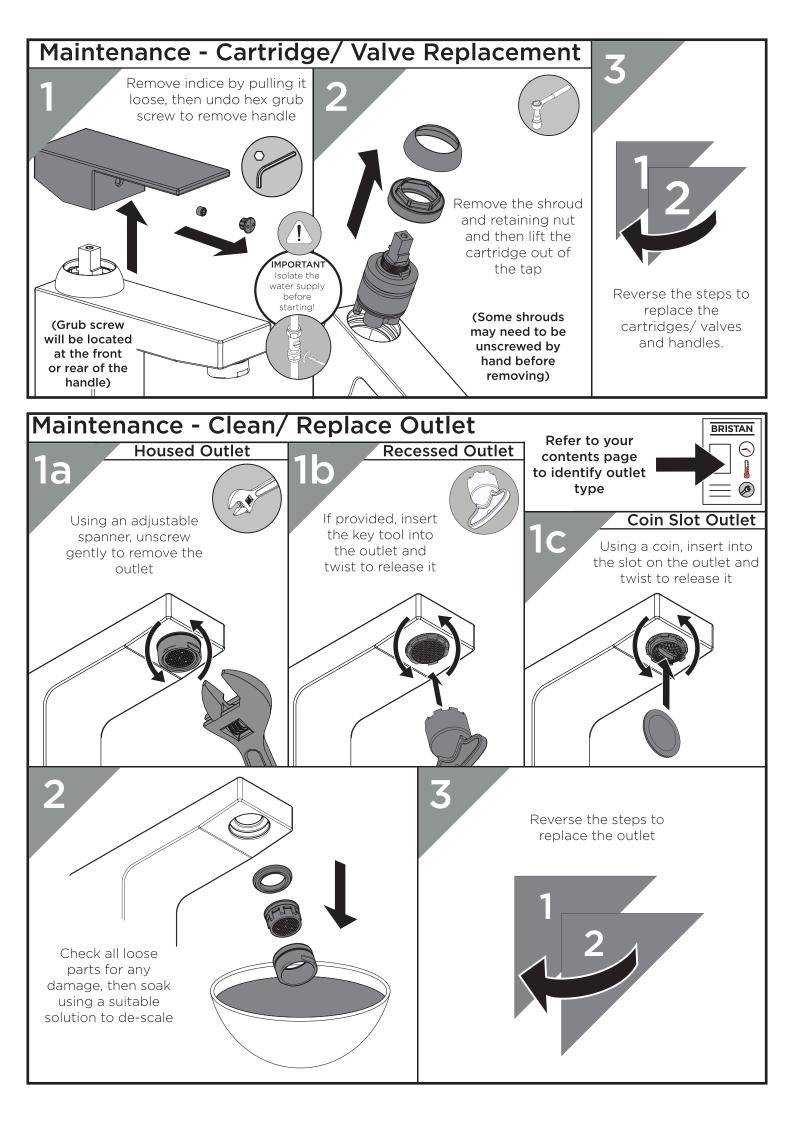

Bristan products are made from premium materials, with hand polished, electroplated, PVD or EPD finishes.

Your taps or shower should be regularly cleaned with warm water, a mild pH-neutral liquid soap, and polished with a soft cloth. Any residues from soap, toothpaste, shampoos and shower gels can cause blemishes if not rinsed off straight after use.

Household bleaches and cleaners contain harsh chemicals and may damage the surface finish. Avoid using abrasive cloths, scouring pads, scrub sponges, steel wool or anything similar.

Troubleshooting Symptom Cause Remedy Partially closed isolation valve. Open isolation valve. Airlock or partial blockage in the supply Flush through pipework to ensure removal of Low Flow debris and any airlocks. pipework. Remove to Clean and soak in suitable Partial blockage in the outlet solution. No hot water or Instantaneous water heater cycles on Increase water flow rate or pressure through cycling hot and and off as flow rate or pressure is too system. cold Closed isolation valve. Open isolation valve. No Flow Mains water supply turned off. Turn on mains water supply. Temperatures not Inlet pipes have been connected Swap the inlet tails around. corresponding incorrectly with taps
