S03	Screw ST4x10		4

Tools Required(not supplied)

Magnetic Crosshead Screwdriver		Silicone Sealant	
Rubber Mallet		Knife	
Spirit Level		Pencil	
Tape Measure		6mm Drill Bit (suitable for wall type)	
Power Drill (with hammer action)		Scissors	

Assembly Instructions

Sliding Door Enclosure

Before You Start

·WARNING : Please read these instructions through carefully before you start the installation. Incorrect product installation may result in serious product failure in use.

Always follow the instructions and retain them for future use.

The thickness of the tiles used will affect the overall position of the enclosure on the tray.

·Check the pack and ensure that you have all of the parts listed . If not, contact your vendor.

·When you are ready to start, make sure you have the right tools to hand, plenty of space and a clean dry area for assembly.

·Two people are required for assembly. Please note that although these instructions are comprehensive, it is always recommended that a technically competent installer should undertake installation.

·Ensure that the enclosure is fitted to a level tray or floor and vertical walls .

·Please note: The wall plugs included with this product are suitable for solid walls only. Plasterboard or stud walls may require specialized fixings which are not provided. (Always ensure that the wall plugs or fittings are correct for the wall type.)

·Caution: Please handle all glass with care. Any damage to the edges, or scratches to the surface that occur during assembly or normal use can cause the glass to break suddenly. Tempered glass will shatter into very small pieces that will still have sharp edges.

·Caution: Care should be taken when drilling into walls to avoid hidden pipes or electrical cables.

·When working near a tray or bath, ensure that the waste is covered so that small parts do not fall down it.

Assembly Instructions

Sliding Door Enclosure

Fig.13

Note: First use a pencil, mark the positions through the pre-drilled screw holes on the corner profile onto the vertical profile for magnetic seal (part S29). Next remove the side panel, and use the 3mm drill bit to drill on the vertical profile for magnetic seal according to the marked positions. Finally insert the vertical profile for magnetic seal into the corner profile of the side panel, and fix them with screw washers (part S04) screws ST4x10 (fittings S03).

Note: Hand-tight only. Do not over tighten, otherwise it will be difficult to put on the corner profile cover strip.

Care & Use

Soapy water is adequate to keep the glass clean, although glass cleaner can be used if required. Scourers, abrasives and chemical cleaners can damage the glass and pattern, and should not be used.

In hard water areas, insoluble lime salts may be deposited on the glass. If this is allowed to build up it becomes increasingly difficult to remove and looks unsightly. Regular cleaning will minimize this effect.
